*** ANNOUNCEMENT ***

--File 515 D&B Dun's Electronic Business Directory is now online completely updated and redesigned. For details, see HELP NEWS 515.

--File 990 - NewsRoom now contains October 2002 to present records.
File 993 - NewsRoom archive contains 2002 records from January 2002-September 2002. To search all 2002 records, BEGIN 990,993 or B NEWS2002

--Alerts have been enhanced to allow a single Alert profile to be stored and run against multiple files. Duplicate removal is available across files and for up to 12 months. The Alert may be run according to the file's update frequency or according to a custom calendar-based schedule. There are no additional prices for these enhanced features. See HELP ALERT for more information.

--U.S. Patents Fulltext (File 654) has been redesigned with new search and display features. See HELP NEWS 654 for information.

--Connect Time joins DialUnits as pricing options on Dialog. See HELP CONNECT for information.

--CLAIMS/US Patents (Files 340,341, 942) have been enhanced with both application and grant publication level in a single record. See HELP NEWS 340 for information.

--SourceOne patents are now delivered to your email inbox as PDF replacing TIFF delivery. See HELP SOURCE1 for more information.

--Important news for public and academic libraries. See HELP LIBRARY for more information.

--Important Notice to Freelance Authors--
See HELP FREELANCE for more information

For information about the access to file 43 please see Help News43.

3/8/1 (Item 1 from file: 5)

14078111 BIOSIS NO.: 200300072140

Ghrelin-induced GH secretion in normal subjects is partially resistant to homologous desensitization by GH-releasing peptide-6.
2002

3/8/2 (Item 2 from file: 5)

14056955 BIOSIS NO.: 200300050984

Ghrelin and des-acyl ghrelin inhibit cell death in cardiomyocytes and endothelial cells through ERK1/2 and PI 3-kinase/AKT.

2002

3/8/3 (Item 3 from file: 5)
14046143 BIOSIS NO.: 200300040172
Ghrelin protects against ethanol-induced gastric ulcers in rats:
Studies on the mechanisms of action.
2003

3/8/4 (Item 4 from file: 5)
14013609 BIOSIS NO.: 200300007638
Natural (ghrelin) and synthetic (hexarelin) GH secretagogues
stimulate H9c2 cardiomyocyte cell proliferation.
2002

3/8/5 (Item 5 from file: 5)
13946393 BIOSIS NO.: 200200575214
Ghrelin secretion is inhibited by either somatostatin or cortistatin
in humans.
2002

3/8/6 (Item 6 from file: 5)
13921507 BIOSIS NO.: 200200550328
Ghrelin injected into the paraventricular nucleus of the hypothalamus
of male rats induces feeding but not penile erection.
2002

3/8/7 (Item 7 from file: 5)
13899972 BIOSIS NO.: 200200528793
EP1572: A novel peptido-mimetic GH secretagogue with potent and selective
GH-releasing activity in man.
2002

3/8/8 (Item 8 from file: 5)
13862410 BIOSIS NO.: 200200491231
Endocrine activities of cortistatin-14 and its interaction with GHRH and
ghrelin in humans.
2002

3/8/9 (Item 9 from file: 5)
13718302 BIOSIS NO.: 200200347123
Neuroendocrine and peripheral activities of ghrelin: Implications in
metabolism and obesity.
2002

3/8/10 (Item 10 from file: 5)
13650114 BIOSIS NO.: 200200278935
Expression of ghrelin and of the GH secretagogue receptor by
pancreatic islet cells and related endocrine tumors.
2002

3/8/11 (Item 11 from file: 5)
13645012 BIOSIS NO.: 200200273833
Short ghrelin peptides neither displace ghrelin binding in
vitro nor stimulate GH release in vivo.
2002

3/8/12 (Item 12 from file: 5)
13620909 BIOSIS NO.: 200200249730
Evidence for a central inhibitory role of growth hormone secretagogues and
ghrelin on gastric acid secretion in conscious rats.

2002

3/8/13 (Item 13 from file: 5)
13512700 BIOSIS NO.: 200200141521
The antiproliferative effect of synthetic peptidyl GH secretagogues in human CALU-1 lung carcinoma cells.
2002

3/8/14 (Item 14 from file: 5)
13319920 BIOSIS NO.: 200100527069
Ghrelin, a natural GH secretagogue produced by the stomach, induces hyperglycemia and reduces insulin secretion in humans.
2001

3/8/15 (Item 15 from file: 5)
13319916 BIOSIS NO.: 200100527065
Ghrelin-producing endocrine tumors of the stomach and intestine.
2001

3/8/16 (Item 16 from file: 5)
13035656 BIOSIS NO.: 200100242805
Identification, characterization, and biological activity of specific receptors for natural (ghrelin) and synthetic growth hormone secretagogues and analogs in human breast carcinomas and cell lines.
2001

3/8/17 (Item 17 from file: 5)
13025986 BIOSIS NO.: 200100233135
Binding of 125I-labeled ghrelin to membranes from human hypothalamus and pituitary gland.
2001

3/8/18 (Item 18 from file: 5)
13013592 BIOSIS NO.: 200100220741
Biologic activities of growth hormone secretagogues in humans.
2001

3/8/19 (Item 19 from file: 5)
13013586 BIOSIS NO.: 200100220735
Growth hormone-releasing hormone and growth hormone secretagogue-receptor ligands: Focus on reproductive system.
2001

3/8/20 (Item 20 from file: 5)
12983358 BIOSIS NO.: 200100190507
Endocrine activities of ghrelin, a natural growth hormone secretagogue (GHS), in humans: Comparison and interactions with hexarelin, a nonnatural peptidyl GHS, and GH-releasing hormone.
2001

3/8/21 (Item 21 from file: 5)
12921210 BIOSIS NO.: 200100128359
Cortistatin, but not somatostatin, binds to growth hormone secretagogue (GHS) receptors of human pituitary gland.
2001

3/8/22 (Item 22 from file: 5)
12761414 BIOSIS NO.: 200000515037
Growth hormone secretagogue binding sites in peripheral human tissues.
2000

3/8/23 (Item 23 from file: 5)
12760233 BIOSIS NO.: 200000513856
Preliminary evidence that Ghrelin, the natural GH secretagogue
(GHS)-receptor ligand, strongly stimulates GH secretion in humans.
2000

3/8/24 (Item 1 from file: 34)
DIALOG(R)File 34:(c) 2003 Inst for Sci Info. All rts. reserv.

11286351 Genuine Article#: 631RK Number of References: 58
Title: Acetylcholine does not play a major role in mediating the endocrine
responses to ghrelin, a natural ligand of the GH secretagogue
receptor, in humans (ABSTRACT AVAILABLE)

SUMMARY LANGUAGE: English

ABSTRACT: An endogenous ligand for the GH secretagogue-receptor
(GHS-receptor) has recently been isolated, from both the rat and the
human stomach, and named ghrelin. It is a 28-amino-acid peptide
showing a unique structure with an n-octanoyl ester at its third serine
residue, which is essential for its potent stimulatory activity on
somatotroph secretion. In fact, it has been demonstrated that
ghrelin specifically stimulates GH secretion from both rat

pituitary cells in culture and rats in vivo. The aim of the present study was to test the GH-releasing activity of ghrelin in humans and to compare it with that of GHRH and hexarelin (HEX), a nonnatural peptidyl GHS, which possesses strong GH-releasing activity but also significantly stimulates PRL, ACTH, and cortisol secretion. To clarify the mechanisms of action underlying the GH-releasing activity of ghrelin in humans, its interaction with GHRH and HEX was also studied. Seven normal young volunteers (7 men; 24-32 yr old; body mass index, 20-24 kg/m²) were studied. All subjects underwent the administration of ghrelin, HEX, and GHRH-29 (1.0 mug/kg iv at 0 min) as well as placebo (2 mL isotonic saline iv at 0 min). Six subjects also underwent the combined administration of ghrelin and GHRH or HEX. Blood samples were taken every 15 min from -15 up to +180 min. GH levels were assayed at each time point in all sessions; PRL, ACTH, cortisol, and aldosterone levels were also assayed after administration of ghrelin and/or HEX. Ghrelin administration induced a prompt and marked increase in circulating GH levels (Cmax, mean \pm SEM, 92.1 \pm 16.7 mug/L; area under the curve, 1894.9 \pm 347.8 mug/Lcntdoth). The GH response to ghrelin was clearly higher ($P < 0.01$) than the one recorded after GHRH (26.7 \pm 8.7 mug/L; 619.6 \pm 174.4 mug/Lcntdoth) and even significantly higher ($P < 0.05$) than after HEX (68.4 \pm 14.7 mug/L; 1546.9 \pm 380.0 mug/Lcntdoth). Ghrelin administration also induced an increase in PRL, ACTH, and cortisol levels; these responses were higher ($P < 0.05$) than those elicited by HEX. A significant increase in aldosterone levels was recorded after ghrelin but not after HEX. The endocrine responses to ghrelin were not modified by the coadministration of HEX. On the other hand, the coadministration of ghrelin and GHRH had a real synergistical effect ($P < 0.05$) on GH secretion (133.6 \pm 22.5 mug/L; 3374.3 \pm 617.3 mug/Lcntdoth). In conclusion, ghrelin, a natural ligand of GHS-receptor, exerts a strong stimulatory effect on GH secretion in humans, releasing more GH than GHRH and even more than a non-natural GHS such as HEX. Ghrelin, as well as HEX, also stimulates lactotroph and corticotroph secretion. Ghrelin shows no interaction with HEX, whereas it has a synergistical effect with GHRH on GH secretion. Thus, ghrelin is a new hormone playing a major role in the control of somatotroph secretion in humans, and its effects are imitated by nonnatural GHS.

 SUMMARY LANGUAGE: English

ABSTRACT: The family of GH secretagogues (GHS) includes peptidyl
 (hexarelin) and nonpeptidyl (MK 0677) molecules possessing specific
 receptors in the brain, pituitary, and thyroid. GHS receptor subtypes
 have also been identified in the heart; and a gastric-derived peptide,
 named ghrelin, has recently been proposed as a natural ligand. Our
 aim was to investigate the presence of GHS receptors in a wide range of
 human tissues, by radioreceptor assay with (125I)Tyr-Ala-hexarelin. GHS
 receptors were detected mainly in the myocardium, but they were also
 present (in order of decreasing binding activity) in adrenal, gonads,
 arteries, lung, liver, skeletal muscle, kidney, pituitary, thyroid,
 adipose tissue, veins, uterus, skin, and lymphnode. In contrast,
 negligible binding was found in parathyroid, pancreas, placenta, mammary
 gland, prostate, salivary gland, stomach, colon, and spleen. Hexarelin,
 MK 0677, and human ghrelin completely displaced the radioligand
 from binding sites of endocrine tissues, but MK 0677 and ghrelin
 were less potent than hexarelin. In nonendocrine tissues, both MK 0677
 and ghrelin were inactive in displacement of
 (125I)Tyr-Ala-hexarelin, whereas hexarelin was as active as a displacing
 agent in endocrine tissues. This study provides the first detailed
 analysis of the tissue localization of GHS receptors and suggests that a
 still unknown receptor subtype, specific for peptidyl GHS, may exist in
 the heart and in other tissues.
